

DataFlex tuning for PostgreSQL

Marco Kuipers – 28 IT – Australia

marco@28it.com.au

Purpose of this talk

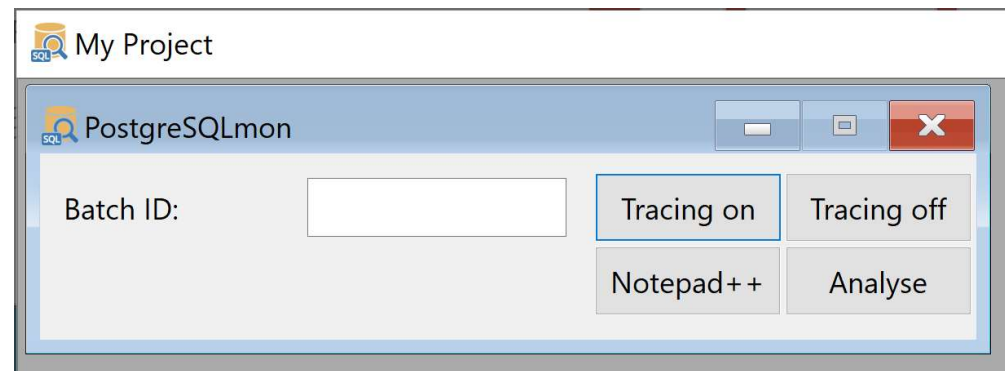

When using or moving to SQL, monitor the SQL statements generated in order to write good code.

Good code would avoid, slow downs on

- › Roll out into production data
- › Increase of data
- › Increase of application size

What SQL is generated when...

- › Order Entry
 - › Entry form
 - › Selection list
- › WebOrderEntry 2023
 - › Login
- › Business processes
 - › Find loops
 - › Reread
 - › Begin / end transaction

DEMO

Thank you!
